

**AT A GLANCE:
7 REASONS THAT SPEAK IN FAVOUR OF WAVISION®**

1. Machinery and system control from a single source
2. Innovative operating concept
3. Web-enabled software
4. Modular, clearly structured design
5. Open interfaces
6. Enhancement of plant efficiency
7. Generation of individual reports

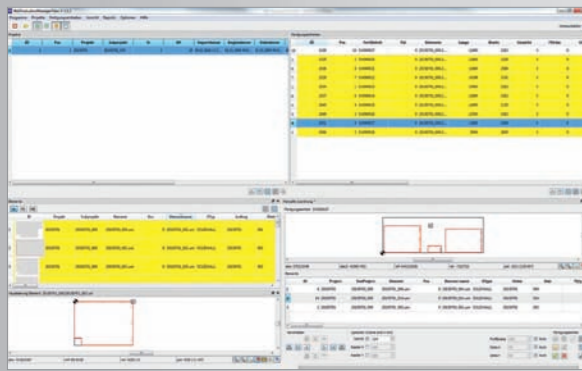

WAvision

The modular control solution for an automated production

04/2016

ProductionManager

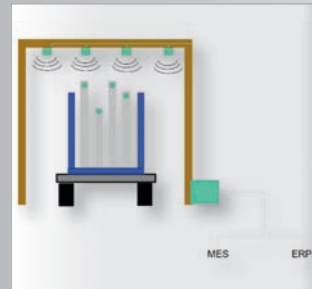

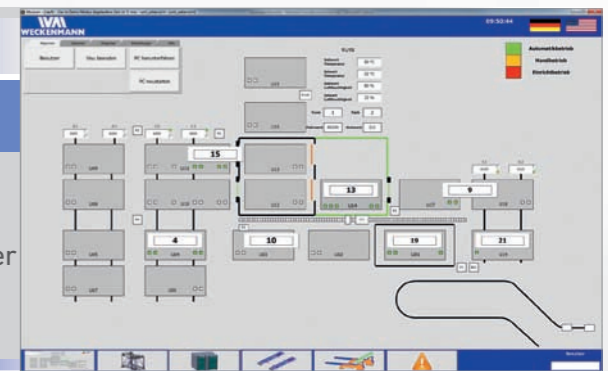

Efficient and simple production planning and order administration

- ▶ The elements are placed manually on the pallet by 'drag and drop'
- ▶ Automatic pallet loading
- ▶ Innovative operating concept

ProductionControl

All relevant information for the production management are displayed at a glance

- ▶ Information regarding the working stations of the pallet circulation
- ▶ Occupancy overview of the curing chamber
- ▶ Manual intervention possibilities
- ▶ Display of faults and message texts

StorageMaster

Module for an efficient storage

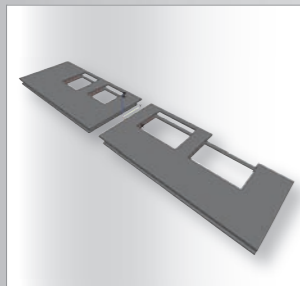

- ▶ By means of barcodes or RFID

Maintenance Assistant

Monitoring and visualization of maintenance tasks

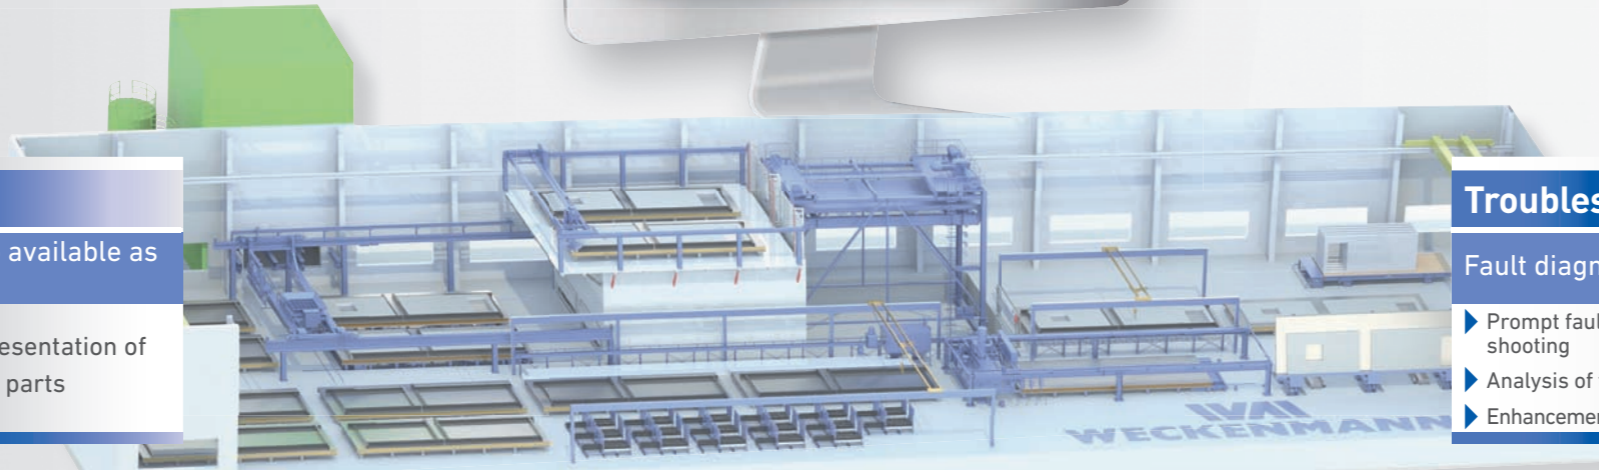

- ▶ Long service life of plants and machines

3D-Viewer

Pallet loading is also available as 3D model

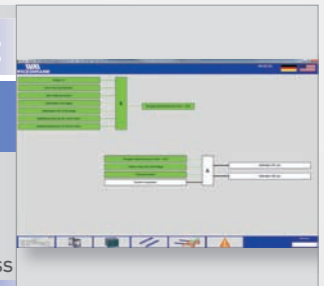

- ▶ Clear and graphic presentation of the precast concrete parts

Troubleshooting Assistant

Fault diagnosis tool

- ▶ Prompt fault diagnosis and troubleshooting
- ▶ Analysis of the weaknesses
- ▶ Enhancement of overall system effectiveness

Reports

Analysing tool in order to generate individual reports

- ▶ All relevant information is available in real time
- ▶ Analysis of the production optimization
- ▶ Very simple overview of the KPIs

WebFlow

Visualization on all major mobile devices

- ▶ Pallet Circulation
- ▶ Reports
